

ASDV 2420

Lab

*12.10 (OutOfMemoryError) Write a class OutOfMemoryError that causes the JVM to throw an OutOfMemoryError and catches and handles this error.

**12.12 Write a method removeAllOccurrences that removes all the occurrences of a specified string from a text file. For example, passing arguments *John, filename* removes the string John from the specified file. Your program should get the input from the user.

**12.30 (Occurrences of each letter) Write a method occurrencesOfEachLetter that prompts the user to enter a file name and displays the occurrences of each letter in the file. Letters are case-insensitive.

Here is a sample run:

Enter a filename: Lincoln.txt

Number of A's: 56

Number of B's: 134

...

Number of Z's: 9
